

JAN CHRISTOPHER BUEN

WordPress Developer & SEO Specialist

Philippines (Remote, US clients) | buenjanchristopher@gmail.com | rankcraftweb.com | github.com/rankcraftweb | linkedin.com/in/jan-christopher-buen

SUMMARY

WordPress developer and SEO specialist who builds and ships full-stack products end to end: custom WordPress themes and plugins, Next.js applications, REST API integrations, and the deployment pipelines behind them. Handles every project personally, from technical audit to production launch, for clients across the US and internationally.

CORE SKILLS

- Custom WordPress theme and plugin development (PHP, no page-builder dependency, or Elementor when it fits the project)
- Full-stack development with Next.js, React, and TypeScript
- REST API design and third-party API integration
- Technical SEO, schema markup, and structured data
- On-page and local SEO strategy
- Site performance optimization and Core Web Vitals
- Deployment and hosting: Vercel, Hostinger, SSH, WP-CLI
- Git version control

EXPERIENCE

Founder & Full-Stack Developer | RankCraft Web (self-initiated ecosystem) 2026 – Present

- Designed and built a three-part product ecosystem end to end: a custom WordPress marketing site, a Next.js website-audit tool deployed on Vercel, and a lead-tracking system, all connected via server-to-server REST API calls.
- Built the WordPress site from scratch with a hand-coded theme (no page builder): custom post types, a working contact form with spam protection, blog, and a case-study system, passing a full pre-launch audit across SEO, performance, accessibility, and security.
- Built the audit tool with Next.js, TypeScript, and Tailwind CSS, integrating Google's PageSpeed Insights API server-side to keep credentials off the client.
- Set up Google Search Console and GA4 tracking, and established a technical-SEO content calendar.

WordPress Developer & SEO Specialist | Freelance – Rossi Real Estate & Ironclad Sites 2026 – Present

- Delivered full website builds (WordPress + Elementor) optimized for performance and search, achieving PageSpeed scores of 95–99 across mobile and desktop for both clients.
- Provide ongoing hosting and management of both clients' live production sites, including updates, uptime monitoring, and technical support.
- Implemented structured data (schema.org) for real-estate and service-business clients, validated through Google's Rich Results Test with zero errors.
- Integrated third-party services including IDX Broker for real-estate MLS listings, and built a custom WordPress plugin for schema markup where off-the-shelf plugins fell short.

EDUCATION

B.S. Industrial Technology, Mechanical Technology

Aurora State College of Technology
